

# **Project Brezobomba and the Prototype**

## **Brezobomba.info**

Incorporating digital technologies to the school routine is a challenging task. The IOT Internet of Things allow to establish the approximation among the contents seen in classroom and the reality in which the student is found. The App Brezoboma.info presents a digital resource that allows the discussion of teaching environmental issues through the use of a playful platform, stimulating interaction of people and technology and proposing a creative environment and interdisciplinary of discussion among students and teachers in the challenges of the real world.
