Ricardo D. Cassali

Ricardo D. Cassali is an undergraduate student at UFRGS. His reserch interests are related to parallel and distributed computing on PC based clusters. He has been working on the implementation of the DECK project.

E-mail: cassali@inf.ufrgs.br

Marcos E. Barreto

Marcos E. Barreto is a PhD student at PPGC/UFRGS. He has taken his Master Degree in 2000 and he currently work within the MultiCluster project.

His research interests are related to parallel and distributed programming over cluster-based architectures, programming environments for parallel computing and performance evaluation.

E-mail: barreto@inf.ufrgs.br

Rafael B. Ávila

Rafael B. Ávila, M.Sc. (UFRGS, 1999), is an associate researcher at GPPD/UFRGS. His working field is parallel and distributed computing with clusters of workstations. Mr. Ávila has helped in the development and implementation of the DPC++ language and in DECK. Currently his work focuses on multi-network clusters and heterogeneous-cluster computing.

E-mail: avila@inf.ufrgs.br

Philippe O. A. Navaux

Philippe O. A. Navaux is a professor at PPGC/UFRGS. He has taken his PhD degree in 1979, in Grenoble, France. He works with parallel and distributed processing, neural networks, superscalar architectures and performance evaluation. He is also the current director of the Institute of Informatics of UFRGS.
