

Cristina Dutra de Aguiar Ciferri

I am an assistant professor at the Departamento de Informática of Universidade Estadual de Maringá. She graduated in Computer Science at Universidade Federal de São Carlos in 1993 and got her master's degree in Computer Science at Universidade Estadual de Campinas in 1995. After that, she worked as a DTI researcher in the PROTEM GEOTEC project in the latter University until initiating her teaching career in March of 1996. At Universidade Estadual de Maringá, she was engaged in important projects such as the Genesis Project - Gene InfoMar, inserted in the Brazilian Program of Software for Exportation (SoftEx 2000), and the AIGLE project, with financial support from the MCT (Ministério da Ciência e Tecnologia). Since August of 1997, she has been working towards her Ph.D. at Universidade Federal de Pernambuco, where she is developing the WebD2W (Web Distributed Data Warehousing) project. Her main areas of interest are data warehousing, heterogeneous databases, distributed databases and World-Wide Web.

Fernando da Fonseca de Souza

Is an associate professor at the Centro de Informática of Universidade Federal de Pernambuco (UFPE), Brazil, where he teaches in the undergraduation and graduation courses in Computer Science, researches and supervises both master and Ph.D. students. He is also the Coordinator of the Computer Science Undergraduation course. He has taken both his undergraduation degree in Civil Engineering (1976) and master's degree (1983) at UFPE and his Ph.D. degree at University of Kent at Canterbury (1992), England. His main areas of interest are databases and information technology for education. He has been taking part in several research projects, amongst them is the FLASH project supported by CNPq - PROTEM III.
